The Society of
Professional Engineers
was founded in 1969.

The Society was pleased to be represented at the Beijing Exhibition – China in May 2007 by our Chief Executive David Gibson, who was able to meet up with members of the Ministry of Construction and Dr Teddy NG of Flaming 21 Ltd.

The Society of Professional Engineers was founded in 1969.

The Society of Professional Engineers (SPE) recently visited Guangzhou University in the People's Republic of China. After discussions with the University and Flaming 21 Ltd, a training company located in Hong Kong, a partnership was formed. This partnership has lead to the accreditation of top-up degrees with the university.

The SPE, working with Flaming 21 Limited, has formalised a training programme which will facilitate the delivery, monitoring and accreditation of postgraduate diplomas in construction management and contract administration.

The postgraduate diploma combines a mixture of assessed work, formal examination and interviews. Candidates successful in the process may progress to membership of the Society. Candidates seeking to participate in the programme are required to have a university degree in a engineering-related subject, be professionally qualified as a registered engineer and have a minimum of

three years' relevant work experience.

The partnership with Flaming 21 Limited and Guangzhou University is a positive development reinforcing the activities of the Society and its global involvement.

The Society of Professional Engineers takes the view that a Professional Engineer is a person of proven competence in his/her speciality in any branch of Engineering and having a facility for deductive and logical thought, the ability to economically develop, adapt and assimilate new theories and techniques.

Flaming 21 Ltd deliver professional and application-orientated education and training services predominantly at the degree and postgraduate level. They also provide appropriate training and/or top-up training for working professionals and mature learners in Hong Kong and China.

Teddy Chun Wah Ng, Flaming 21 Limited and David Gibson, Society of Professional Engineers

Guangzhou University was approved by the Ministry of Education in China, and founded as a multi-disciplinary university on 11 July 2000 by merging the tertiary educational institutions previously known as Guangzhou Normal University, South China Institute of Construction, Guangzhou University, Guangzhou Junior Teachers' College and Guangzhou Institute of Education.

Self Inking Personal Stamps

As Members will be aware the Society has for many years had on offer a Stamp for use on notepaper and drawings containing the name of the Society and the name and Registration Number of the Member. The Firm that supplies the Stamps can now offer a self-inking Stamp which produces an even more finished appearance and is enclosed in an impressive case that will sit well on the office desk. These are now available from the Society at the modest price of £30.00 each which includes VAT, postage and packing.

Lapel Badges

Lapel Badges are now available from the Society at a cost of £2.00 each inclusive of postage. All paid up members are encouraged to purchase a lapel badge to indicate their membership of the Society, and to be proud to wear it among their professional colleagues.
